

Product Description

Hepburn is an elegant combination of classic looks and advanced modern technology. This is a family of miniaturized LED spotlight designed to achieve smallest size of the same power in industry, therefore to meet visual and aesthetic requirement for interior design. Small body can reduce thermal contact resistance and help for heat dissipation. Meanwhile, adoption of advanced thermal superconductor technology with 300,000w/mk guarantees heat generated from LED being instantly transferred and radiated into the air. This keeps the fitting in good lumen maintenance and long lifespan. Hepburn is designed in a variety of different installations to be the perfect match for every environment.
